

GRAY SMITH

WEB DEVELOPER

SUMMARY

I am a full stack developer with an emphasis in frontend development, 3+ years of self training, and a passion for intuitive and beautiful UI/UX design.

My main goals in the workplace are to bring a positive energy to those around me, consistently ship code that I am proud of, and to continue to learn and grow as an engineer.

I take great pride and ownership in my work and I am always excited to learn new technologies and to graciously accept feedback so that I can always continue to refine my craft.

EDUCATION

Bachelor of Science, Business Administration
University of Colorado Boulder
- Emphasis in Finance & Management

Front-End Engineering Program
Turing School of Software & Design
